ABOUT ME

I'm an experienced Backend Developer and Systems Analyst, with strong knowledge of Java 8, databases programming (Oracle, PostgreSQL, MySQL and others), microservices development using spring framework, spring boot and their associated frameworks like Hibernate, JPA, etc. Have been working with Java for the last 13 years, and recently started working with platform integrations using Apache NiFi, AWS (SQS, EC2, S3, DynamoDB) and Web Services. I also have good knowledge of other technologies such as Docker, Biometrics and NoSQL databases. I'm a fast learner and I'm constantly looking forward to learn new technologies, face new challenges and improving my abilities.

WORK EXPERIENCE

Linx (May/2018 – present day) – São Paulo - SP
 Senior Analyst Developer

- Java development with the focus on JEE.
- Creation and maintenance of custom processors implementation for Apache NiFi.
- Use of web-services and AWS for platform integrations.

PRODAM – Processamento de Dados Amazonas (Aug/2010 – Apr/2018) – Manaus - AM
 Senior Java Specialist Programmer

- Java development using JSE and JEE
- Extensive use of Hibernate, Spring, JPA, Struts, REST web-services and others
- Relational (Oracle, PostgreSql and MySQL) and NoSQL (Cassandra) database programming
- Application specification using Use Cases and UML as well as database modeling using ExR.

Advance Turismo (Feb/2008 – Nov/2009) – São Paulo – SP
Software Programmer

- Web application development using Java EE and GWT (Google Web Toolkit)
- PostgreSQL database programming

Previous Experience (1992 - 2008) - Recife – PE, Manaus – AM and São Paulo - SP
Senior Developer / Systems Analyst

- Requirements Specifications for desktop and mobile phone games applications using UML
- Application development using Java ME/EE/SE and Delphi.
- Relational database programming using SQL for Oracle, PostgreSQL and MySQL

EDUCATION

- *Information Technology Administration* (Associate Degree)

  South of Santa Catarina University (UNISUL) – Dec/2020 (on course)

- *Systems Analysis and Information Technology* (undergraduate/High School)

  Mathias Machline Foundation, Manaus/AM - Dec/1991

TECHNICAL SKILLS

- As an experienced System Analyst, I have specified and worked with applications for a large number of fields including Human Resources, Accounting and Management.

- As a developer I have created and maintained more than 20 applications for Desktop, Web and Mobile Phones, using Java, Go and Delphi. I also did some testing with Python, C# and PHP.

- With Java, I have worked with Spring Framework, Spring Boot, Hibernate, JPA. Have also created microservices using REST API. Have also worked with JEE applications using front-end implementations in AngularJS, Javascript, Bootstrap and Material Design.

- Have a very good knowledge of relational (Oracle, PostgreSQL, MySQL) and NoSQL databases (DynamoDb, CouchDb, MongoDb), Docker, Linux and MacOs environments.

- Sun Certified Programmer for Java 1.4, but currently using Java 8. Sun Certified Mobile Application Developer 1.0.

- Good Knowledge of Project Management (PMI best practices), ANDROID programming, Agile projects with SCRUM and Kanban and other practices. I also have some small experience with Team Leading.

- I Have Experience with Database administration and programming with SQL Server, MySQL, Postgres and Oracle RDBMS

- Experience implementing applications using biometrics technology.

LANGUAGES

- Brazilian Portuguese (native)
- English (fluent/advanced)
- German (basic reading and speaking [under study])
- Spanish (basic reading)
